A COLLECTION OF TECHNICAL PAPERS
Volume 10

13th AIAA/ASME/AHS Adaptive Structures Conference
7th AIAA Non-Deterministic Approaches Forum
6th AIAA Gossamer Spacecraft Forum
1st AIAA Multidisciplinary Design Optimization Specialist Conference

AUSTIN, TEXAS
18–21 APRIL 2005

AIAA-2005-2328 Structural and Acoustic Damping Characteristics of Polyimide Microspheres
D. Palumbo and J. Park ................................................................. 6442

AIAA-2005-2329 Optimal Non-Obstructive Particle Damping (NOPD) Treatment Configuration
H. Panossian and B. Kovac ............................................................. 6455

AIAA-2005-2330 Update on the Joint Aircraft Survivability
M. Weisenbach, A. Kurtz, and G. Czarnecki .................................... 6467

AIAA-2005-2331 Comparison and Validation of Smooth Particle Hydrodynamics (SPH) and Coupled Euler Lagrange (CEL) Techniques for Modeling Hydrodynamic Ram
C. Sparks, R. Hinrichsen, and D. Friedmann .................................... 6471

AIAA-2005-2332 Aircraft Ballistic Initiated Fire Modeling
R. Dexter and A. Pascal ................................................................. 6492

AIAA-2005-2333 Experimental Simulation of Fuel Pool Ignition by Incendiary Flash
P. Disimile and N. Toy ................................................................. 6501

AIAA-2005-2334 Experimental Investigation of Hot Surface Ignition for Transportation Survivability
P. Disimile, N. Toy, and X. Bai ....................................................... 6510

AIAA-2005-2337 Determination of the Ballistic Performance of a Cold-Rolled, Deep-Drawing Sheet Metal
M. Buyuk, E. Musayev, S. Ulku, C. Kan, D. Marzougui, and A. Durmus ................................................................. 6520

AIAA-2005-2338 Approximate Optimization Method as an Efficient Design Methodology for Armors Under Ballistic Impacts
M. Buyuk, H. Kurtaran, C. Kan, and D. Marzougui ................................................................. 6529

AIAA-2005-2339 Nonlinear Damped Vibrations of a Laminated Composite Plate Subject to Blast Load
Z. Kazanci and Z. Mecitoglu ............................................................. 6539

AIAA-2005-2341 Velocity Profiles for Synthetic Jets Using Piezoelectric Circular Actuators
K. Mossi, P. Mane, and R. Bryant ..................................................... 6550

AIAA-2005-2343 Selection of Characteristic Constraint Modes for Component Mode Synthesis Using a Modification of Effective Interface Mass
D. Simon and T. Cost ................................................................. 6564

Advanced Rapid Mirror Assembly Processing
T. Mah, H. Lee, R. Bhattacharya, B. Majumdar, A. Maji, and L. Matson ................................................................. 6723

Elastic Memory Composite Material: An Enabling Technology for Future Furlable Space Structures

Steering Mirror Design and Dynamic Controls for a Dual-actuation Platform Using High-strain Actuators
S. Woody and S. Smith ........................................................................ 6744

Smart Materials for Gossamer Spacecraft - Performance Limitations
T. Dargaville, M. Celina, P. Chaplya, and R. Assink .................... 6765

The Effects of Folding on the Dimensional Stability of Rigidizable Composite Laminates
T. Murphey and M. Maddux ................................................................. 6778

Consistent Structural Integrity in Preliminary Design Using Experimentally Validated Analysis
C. Collier and P. Yarrington ................................................................. 6785

Failure Analysis of Discrete Damaged Tailored Extension-Shear-Coupled Stiffened Composite Panels
D. Baker .......................................................................................... 6815

Simulation of Progressive Failure in Multidirectional Composite Laminated Panels
A. Waas, D. Ambur, and S. Basu ......................................................... 6835

Buckling and Failure of Compression-loaded Composite Cylindrical Shells with Reinforced Cutouts
M. Hilburger and M. Nemeth ............................................................... 6873

Aerelastic Loads in Response to Concentrated Excitation Using Fictitious Masses
M. Karpel, B. Moulin, L. Anguita, C. Maderuelo, and H. Climent ...... 6897

Supersonic Panel Flutter Analysis and Suppression Using Aeroelastic Modes and Shape Memory Alloys
X. Guo, A. Przekop, and C. Mei .......................................................... 6908

Nonlinear Flutter of Cylindrical Panels Under Yawed Supersonic Flow Using Finite Elements
M. Azzouz and C. Mei ......................................................................... 6922
AIAA-2005-2374 Controllers for Disturbance Rejection for a Linear Input-Varying Class of Morphing Aircraft
R. Lind, K. Boothe, and K. Fitzpatrick ...........................................6940

AIAA-2005-2375 Implications of Time-Delayed Feedback Control on LCO of Supersonic Lifting Surfaces
L. Librescu, P. Marzocca, P. Yu, and Z. Chen ......................................6954

AIAA-2005-2376 Failure Analysis of Adhesively Bonded Composite Joints
J. Zhang, C. Collier, B. Bednarcyk, and P. Yarrington .........................6972

AIAA-2005-2377 Fatigue Testing of a Stiffened Lap Joint Curved Fuselage Structure
A. Ahmed, J. Bakuckas, J. Awerbuch, A. Lau, and T. Tan .....................6995

AIAA-2005-2378 Parameter Identification and Investigation of a Bolted Joint Model
J. Slater, C. Pettit, S. Page, and O. Shiryayev ................................7007

S. Clay, A. Pommer, and R. Jones ..................................................7026

AIAA-2005-2380 Nonlinear Analysis of Bonded Composite Tubular Lap Joints
E. Madenci, D. Ambur, S. Smeltzer, and E. Oterkus ............................7043

AIAA-2005-2381 Free Vibrations of Composite Mindlin Plates with a Symmetric Lap (or Doubler) Joint
U. Yuceoglu, Ö. Güvendik, and V. Özericiyes ..................................7057

AIAA-2005-2383 Orbital Debris Shape Effects on Ballistic Limit Curves: A Hydrocode Analysis
S. Evans and J. Williamsen ..........................................................7074

AIAA-2005-2384 Joint Live Fire Aircraft Systems FY04 Program
J. Wuich .........................................................................................7086

AIAA-2005-2385 NASA Research in Aircraft Vulnerability Mitigation
C. Allen ..........................................................................................7091

AIAA-2005-2386 Zone-Based Modeling Technique for Vulnerability/Lethality Studies
M. Butkiewicz and W. Bowman .......................................................7102

AIAA-2005-2387 Predictive Modeling Assessment of a Crushable Foam Material
F. Hemez .........................................................................................7107
